

Before you begin

- ☐ Use the test account and sample client details.
- ☐ Say what you expect before selecting a button.
- ☐ Complete each task without step-by-step assistance.
- ☐ Report anything confusing, slow, or unclear.

Important

An estimate is an initial price guide. A submitted request is not a confirmed booking. Final details and confirmation are completed through direct communication.

Tell us what you noticed

The easiest part was...

The most confusing part was...

A label or instruction I would change is...

The first improvement I would make is...

Owner validation

Does this prototype reflect how you want to manage the studio?

Prototype guide

A short guide for reviewing the public website, estimate and booking request, and owner dashboard.

OWNER REVIEW

September 22, 2026

PART 1

Explore the public website

1

Open the home page

Review the main photograph, introduction, selected work, services, About section, music controls, FAQ, and contact details.

2

Browse the work

Open a portfolio category and view a photography collection. Check whether the images and labels are clear.

3

Review a service

Select a service and confirm that its description, starting price, and next action are understandable.

While reviewing

Check the site on both laptop and phone. Note any cramped text, excessive spacing, missing content, or controls that are difficult to find.

PART 2

Create an estimate and request

1

Build the estimate

Choose an event or service, coverage duration, and any available add-ons. Review the estimated price range.

2

Continue to request

Proceed to the booking request when the estimate is acceptable. The estimate remains a guide, not a final quotation.

3

Provide event details

Enter sample contact and event information, review the privacy agreement, and submit the test request.

4

Read the confirmation

Confirm that the next steps are clear: the owner reviews the request, discusses details, and communicates final approval.

PART 3

Review and manage as owner

1

Dashboard

Review the current overview and open the newest client request.

2

Client Requests

Check the event, estimate, contact details, and request status.

3

Calendar

Verify the date and look for possible schedule conflicts.

4

Website Content

Change sample home, About, music, FAQ, or booking-page content.

5

Services and Estimator

Change one service price and verify that the public estimate uses the updated amount.

6

Portfolio and Contacts

Locate where photographs, featured work, and contact links are updated.
